Scenario Solutions

Restaurant Experience Process

Intelligent end-to-end Business Process

Pre-meal: Promotion

New and Innovative Store Marketing Methods

The large mobile advertising screen provides a broader, more frequent, eye-catching, and precise marketing method for stores, allowing the store's brand, promotional activities, special products, etc., to reach more customers and further improve the conversion rate of marketing campaigns.

Pre-meal: Promotion

Enhancing Consumer Experience Differentiation and Promoting Customer Flow Conversion Quickly

With more eye-catching and novel ways of attracting customers, smarter and more thoughtful dining services, and more convenient product access, customers can enjoy a completely new store experience, which quickly enhances the store's differentiation and competitiveness, and leads to faster customer flow conversion.

Ketty 18.5" Ads screen, variety promotion

Promotion more accuracy

- Utilizing intelligent LCD screens to attract customers from all angles
- Large advertising screens better fitting the customer's perspective
- Combining with speakers to significantly attract family-style customers
- Supporting multiple scenarios, allowing for customizable media size and content
- Supporting various types of media, such as audio, video, images, and links

Weight	38KG
Charging time	4.5H (support self-charging)
Battery life	> 8H
Speed	0.5-1.2m/s

PUDU2 32" Capacitive touch advertising screen

The interaction is diversified

- Seamlessly integrated mobile robots with advertising screens
- Display a variety of videos and showcase promotional content in real time.
- Indoor mobile advertising machine can bring message directly to target audience
- Product promotion, brand promotion, and marketing display, easily achieve marketing objectives

Weight	39KG (PUDU2) + 13KG (AD Screen)
Charging time	8H
DPI	1920*1080
AD Screen power supply	Via robot charging port

Pre-meal: Promotion

Robot with Ad screen

33.4 RMB

(Unlimited usage, single daily fee /device)

Traditional fixed Ad screen

200 RMB

(15s/180times/day/point)

Attraction

Integrating movable and technology can deliver a more engaging and interactive viewing experience, driving greater viewer interest and attention

Most traditional advertising relies on static images and videos, which can lack creativity and fail to make a lasting impression.

Usability

With a simple setup on a computer, it is easily published and manages Ad content on our robots, leveraging the latest in wireless communication technology

Need labor work when change the content

Coverage

Our robots are movable, allowing for flexible and unrestricted coverage of any area

Unmovable, fixed area, restricted range about 0-5meter

Cost

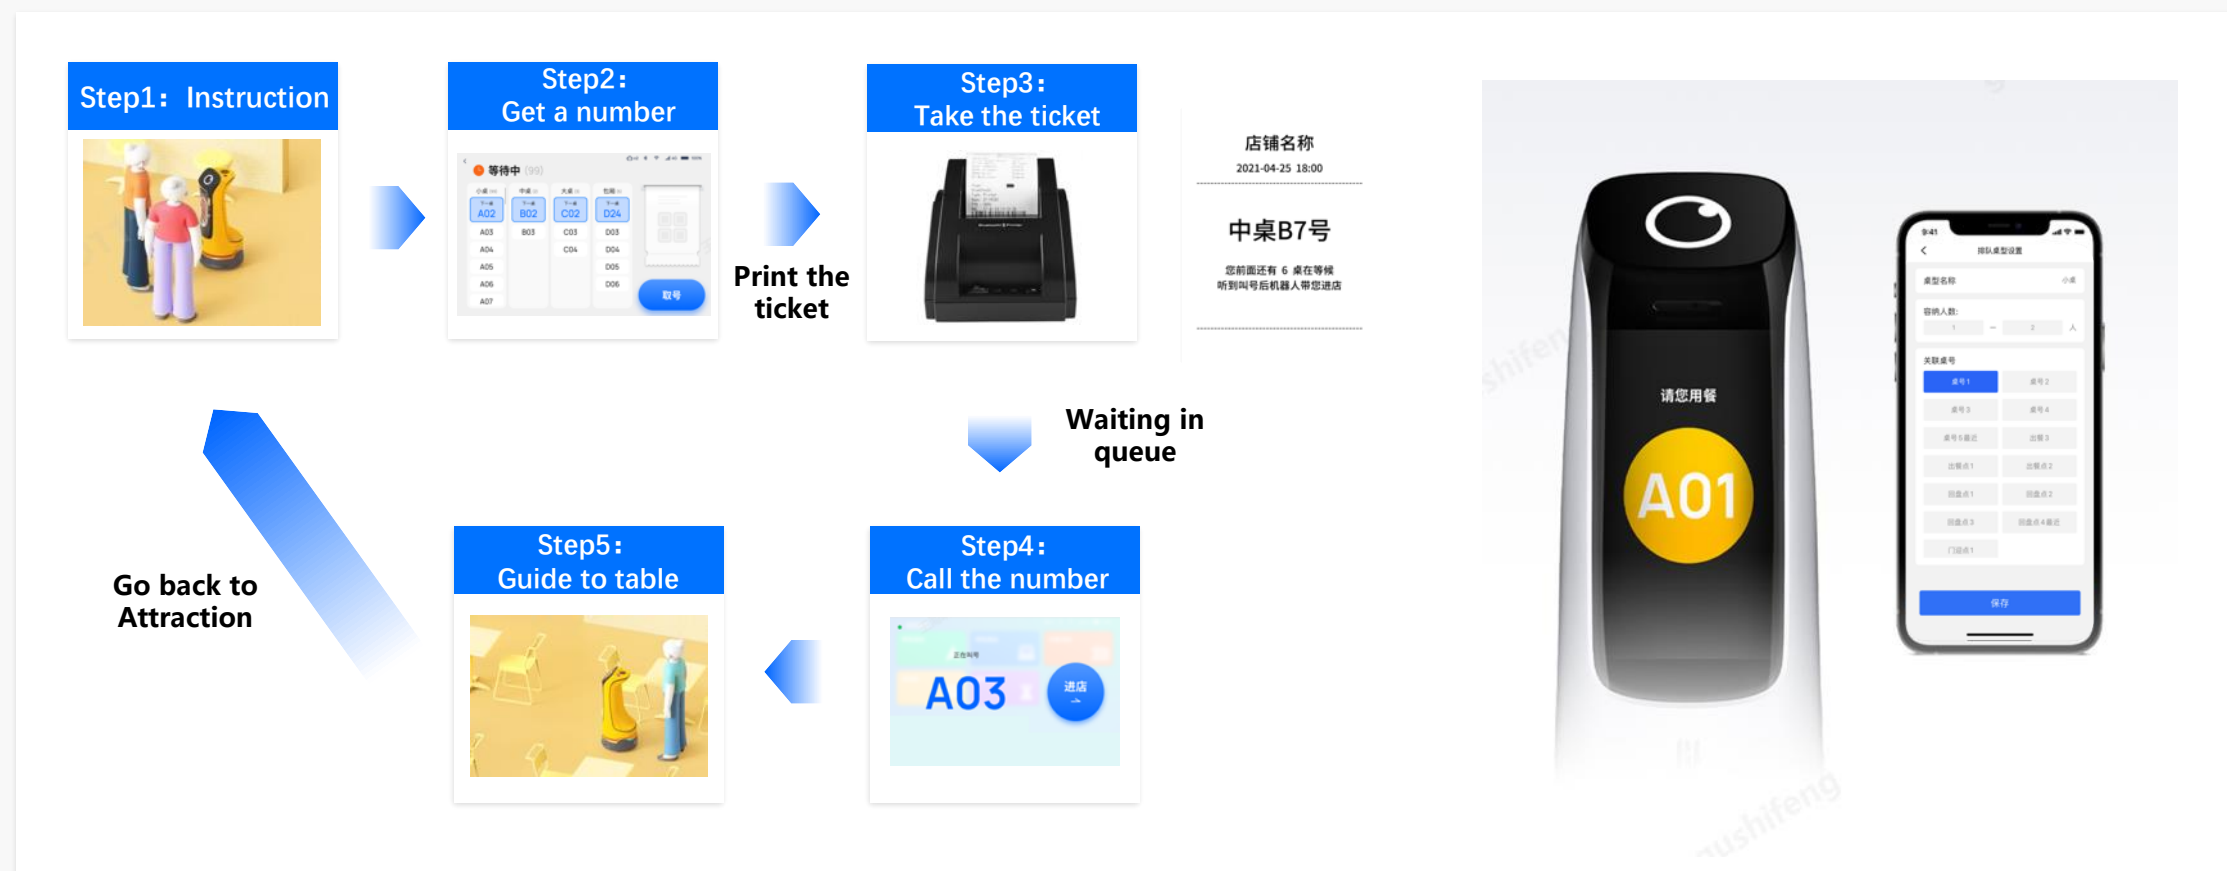

With movable robots and large-screen advertising, can provide flexible and customizable advertising options that can meet the specific needs of any coverage area.

Traditional fixed advertising screens retail settings often require multiple screens to effectively support marketing and promotional efforts, resulting in higher costs.

Pre-meal: Queue calling + Guide to table

Attraction → Queue calling → Guide to table, piece together without a break

The KettyBot can be used for the entire process of greeting, queuing, and seating after the table has been configured on the Pudu Link App, and an external Bluetooth printer can be used for printing vouchers such as queue number tickets.

Dining: Seat and Order

Pudu OS	Support to re-customize the whole process of the robot APP	Pudu2、Bella

Post-meal: Clear the table

Multi-functional: 5 Modes Switchable with One Click

In order to adapt to different scenarios robot provides a variety of modes to choose from.

Remote call

60KG load capacity

Contactless delivery

Autonomous positioning navigation

Intelligent audio source tracking

Digitized management

IPX5 waterproof

Multiple modes

Changeable battery

Mode.1: Manual mode

Manually edit the tasks, can click the screen, or press the pause button to modify the tasks at any time.

Mode.2: Go Dishwashing

Go back to the dishwashing area

Mode.3: Go standby point

Go back to standby point

Mode.4: Dish-return Mode

Go back to standby point

Mode.5: scheduled return

Select an automatic return time, and the robot will go back

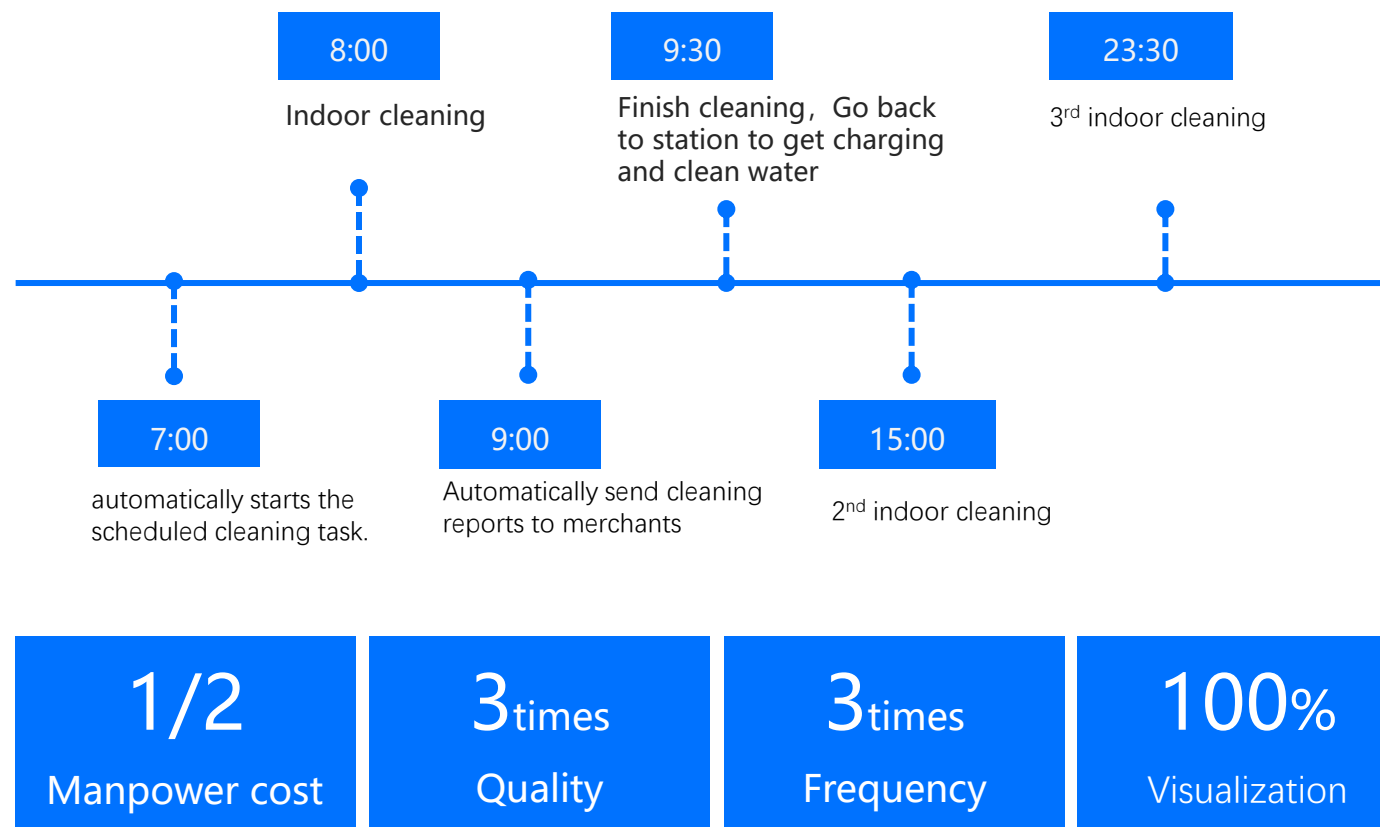

Post-meal: Cleaning

- ✓ Save manpower、time、money
- ✓ One machine, multiple cleaning modes, suitable for multiple scenarios.
- ✓ 24-hour operation, fully automatic
- ✓ Simple, user-friendly, reliable, and stable
- ✓ Check the machine status at any time
- ✓ Presentation of cleaning reports

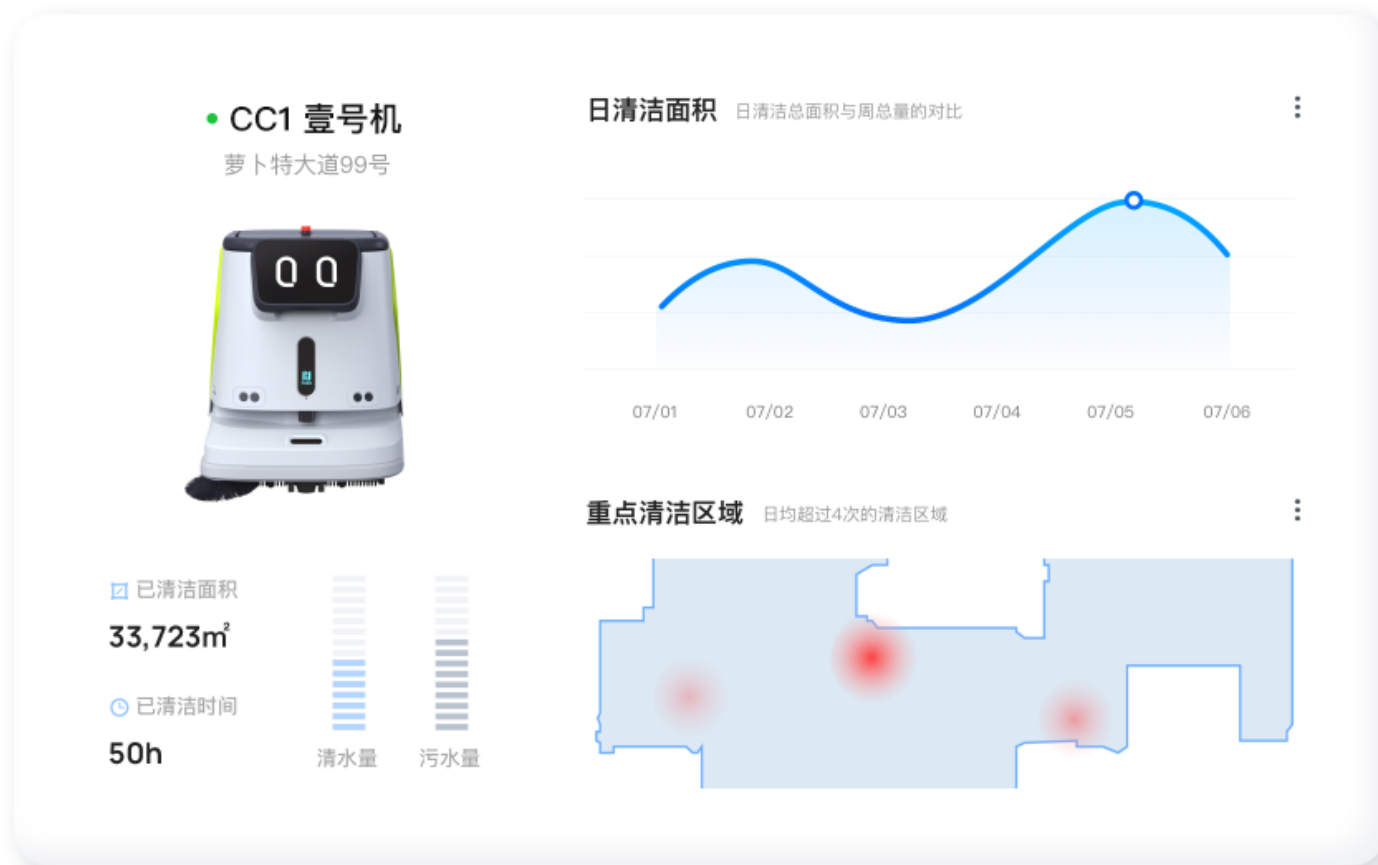

One day of CC1

Post-meal: Cleaning

Digital Platform

Real-time synchronization of cleaning data, display of cleaning duration, area, etc., self-generated cleaning reports, and clear cleaning results

Special Scenario: System Interconnection

Integration

android

PUDU OS

Connection

SDK

Smart catering integration

After the robot greets, guides customers to order directly via robot

After the kitchen completes the dish, called the robot comes to collect the dish

After the customer finishes their meal, they call the robot to pay the bill

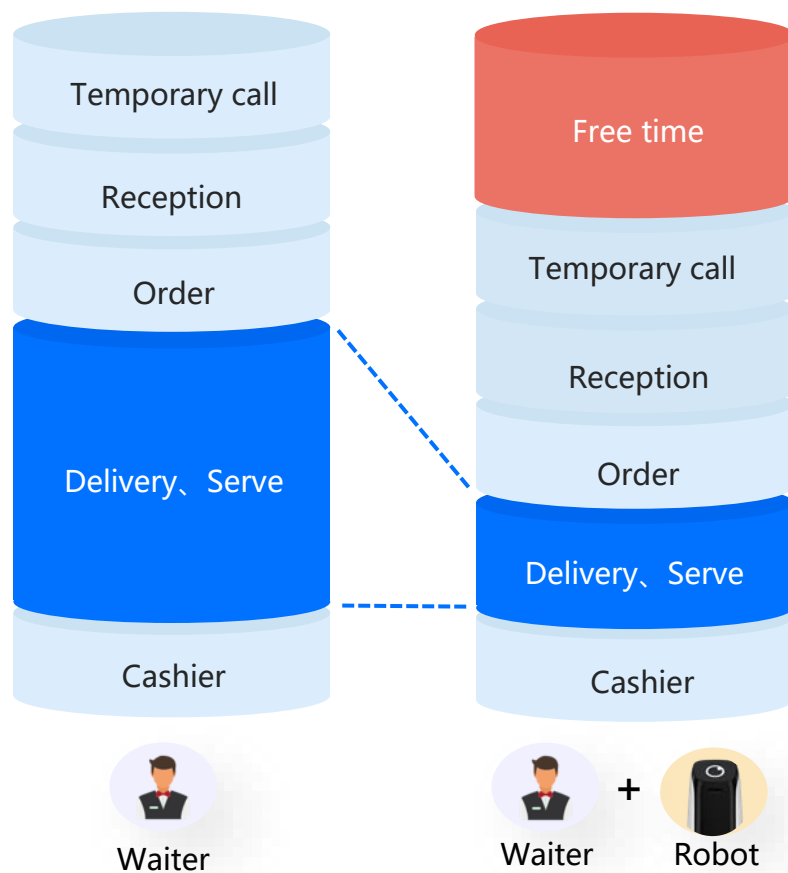

Through the catering system, the operator can view the operation status of the robot

02

Successful Cases

Value Summary

Improve service quality
and business efficiency

Simplify the input cost of
substitute services

Improve the working atmosphere

- ✓ Reduce the duration of service staff's single-task work
- ✓ Reduce emotional exhaustion of service staff
- ✓ Increase their free time and opportunities for self-growth

Improve customer dining satisfaction

- ✓ Guide customers to experience the new services brought by robots,
- ✓ Reduce direct contact with customers during meal delivery, and lower the risk of bacterial transmission

Improve restaurant operation efficiency

- ✓ Improve the job stability of service personnel
- ✓ Reduce the related costs of recruiting service personnel

Successful Cases - Hunter Bar

Location: Oslo Airport International Terminal, Norway.

Industry: Travel catering services.

Employees: 4 on duty and 1 on shift, each on duty for 6 hours.

Business hours: 10:00-22:00.

Table QTY: 35table,
120+seats

Aisle: Minimum width
1.3m

Acreage: 400m²

Kitchen: Closed
kitchen

Successful Cases - Hunter Bar

Process

1 Order & Payment at reception counter

2 The staff manually associates the order number with the location board number

3 After customers randomly select the table, place the positioning board on the table and wait for delivery

4 The intelligent positioning system obtains the location information of the positioning board and displays it on the screen

7 After the robot arrives, the customer picks up the meal on their own and places the positioning board on the robot pallet, which is then brought back to the reception counter by the robot

6 Robot deliver food to the located tables

5 When the meal is ready, the staff operates the robot to deliver the meal based on the order number and location information

Configuration

Item	QTY

Successful Cases - Hunter Bar

The combination of 3rd party table positioning system with Pudu delivery robot solution is coordinated and operated by restaurant staff, and no telecommunication required between the two independent systems with high reliability

Powerful

- ✓ Daily average operating distance **2km** per robot
- ✓ Delivery capacity high up **200+** times

Rapid

- ✓ Rapid response and delivery, reduce waiting anxiety significantly
- ✓ At peak hours, the average waiting time reduce **30%**

Easy

- ✓ Easy deployment
- ✓ No need to change to the original working procedure

Technology

- ✓ Funny experience created by participating in the use of an intelligent robot
- ✓ Free to choose a seat without limitation
- ✓ Experience the convenience and efficiency

PUDU Introduction

PUDU Introduction

Pudu Robotics

In 2016, Pudu Technology was founded in Shenzhen as a national high-tech enterprise that specializes in research, design, production, and sales of commercial service robots. After seven years of development, Pudu Technology has established hundreds of service points worldwide, with business in over 60 countries and regions, delivering more than 56,000 units. It has become a leader in the field of commercial service robots globally. In the age of intelligence, Pudu Technology will continue to uphold the "inventor's spirit" and solidify its technology, refine its products, create truly useful robot products, and enhance the efficiency of human production and life.

* Relevant statistics as of December 2022
