

Reject The Useless Cost Simplify & Better Service

PUDU Tech. – Cafeteria "Intelligent Service" Robot Solution

Company Introduction

PUDU Technology Co., Ltd. was founded in Shenzhen China in 2016 who is a four-dimensional integrated enterprise integrating R&D, design, production and sales.

As a leader in the field of commercial service robots. PUDU has also been favored by capital. At present, it has received more than 1 billion investment from well-known industrial investors and funds such as Meituan, Tencent, Sequoia, Shenzhen Investment Holdings, Greater Bay Area Fund, and Puhua Capital.

Number Of Employees

1000+

The number of employees around the world has exceeded 1000+

Market share of the whole scene

TOP1

The market share of commercial service robot is the first in the whole scene (More than the market 2-5 combined)

Overseas catering market share

>80%

Overseas catering market share>80%

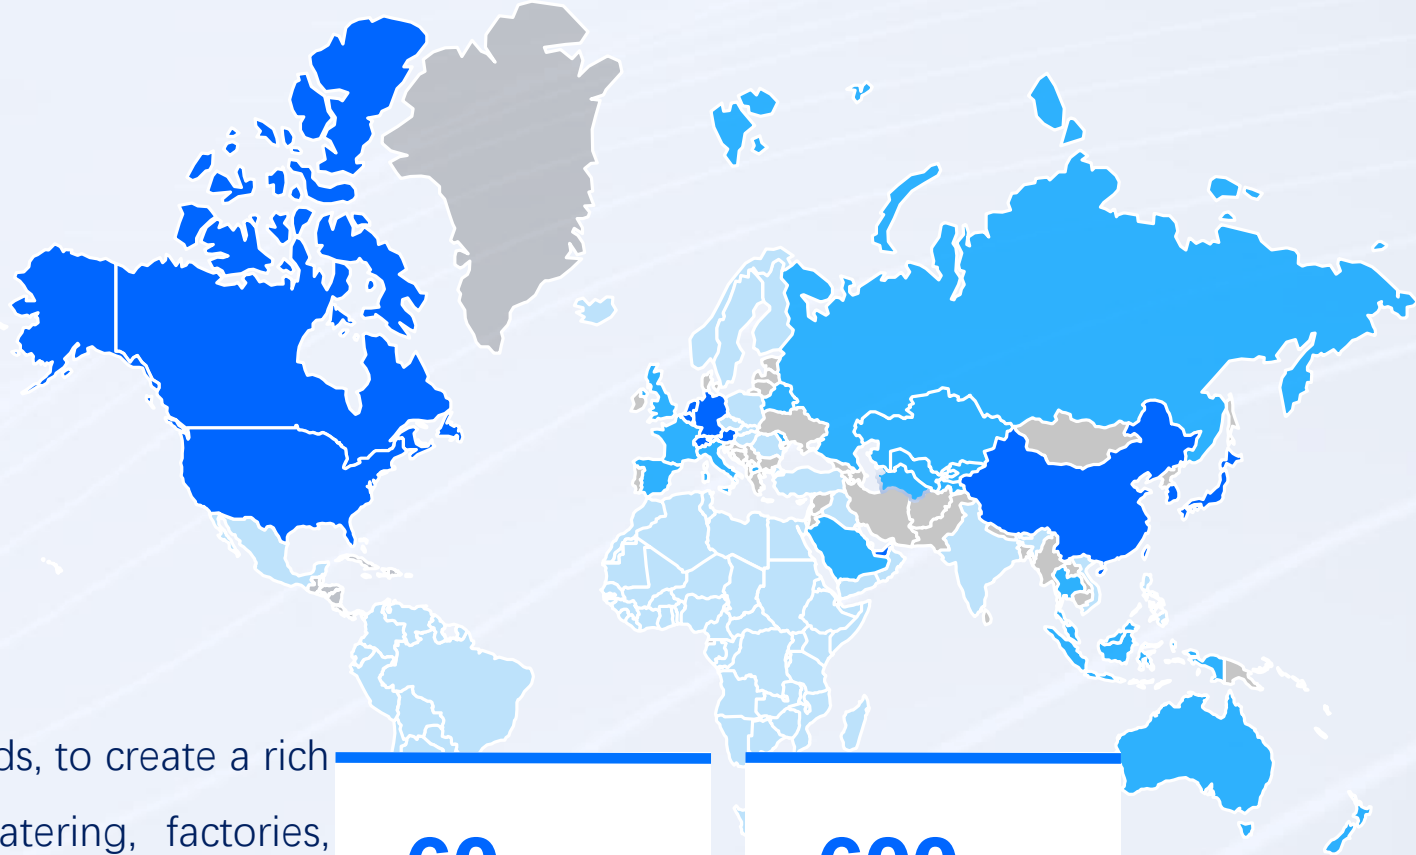

Based in China, Overlooking the world

Globalization

Up to now, PUDU Tech. has formed a global development layout based on six major regions including North America, Europe, East Asia, Asia-Pacific, Middle East, and Latin America.

Full scene coverage

Through the in-depth analysis of end-user needs, to create a rich product matrix, to achieve hospital, KTV, catering, factories, hotels and other different scenes full coverage.

60 +

- Covers more than 60 countries and regions

600 +

- More than 60 cities

Patent & Certificate

PUDU Robots have passed the following certifications

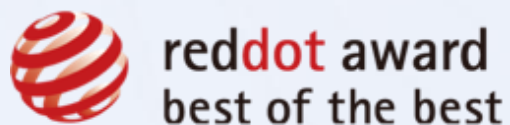

PUDU Tech. has applied for about **1300+** core patents, covering robot positioning and navigation, motion control, human-computer interaction, mechatronics design, robotic arm, servo motor, computer vision, robot cloud platform and other fields.

Honorary Award

Pudu Robotics has been recognized by organizations and institutions in various industries.

Chapter 1 , Industry Situation

What's the cafeteria?

Cafeteria:

Restaurant where customers choose dishes that suit their own tastes.

Features:

Dishes management: rapid supply, various types of dishes;

Dining management: fixed dining time (Mostly) ;

Service management: mainly self-service, fewer waiters;

High Cost

Multiple Dishes

Ingredients Waste

Staffing Shortage of the cafeteria

*Restaurant jobs data was sourced from over 2,400 job postings from over 1,800 restaurants. | From 7Shifts

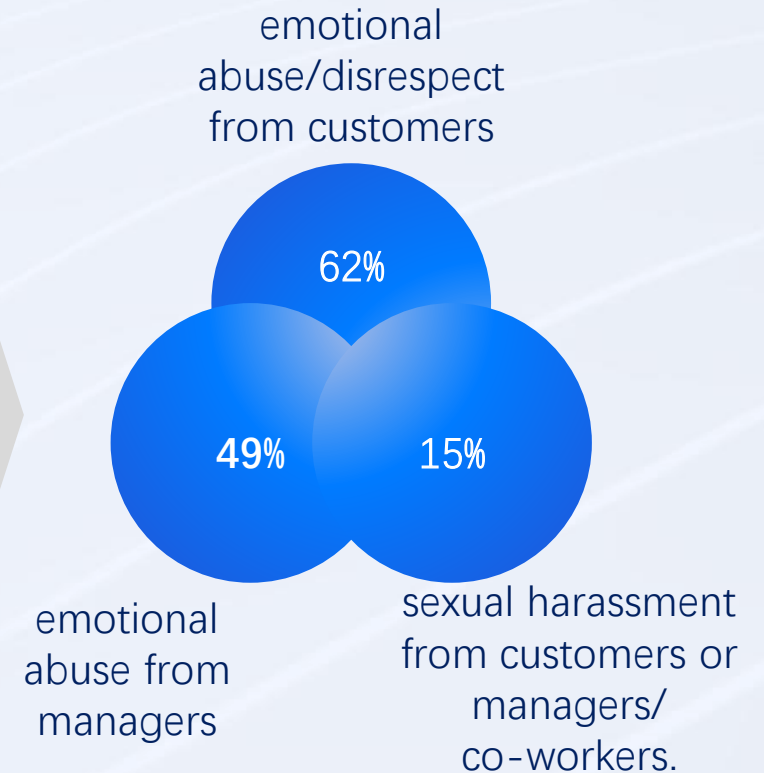

26% of restaurants say they are looking for cooks and line cooks, while 17% are in need of servers.

Full-service concepts are operating with **6.2 fewer** employees in the back of house and **2.8 fewer** staff members in the front of house .

*According to a report by Black Box Intelligence and Snagajob that includes survey results from over 4,700 former, current and future hourly restaurant workers.

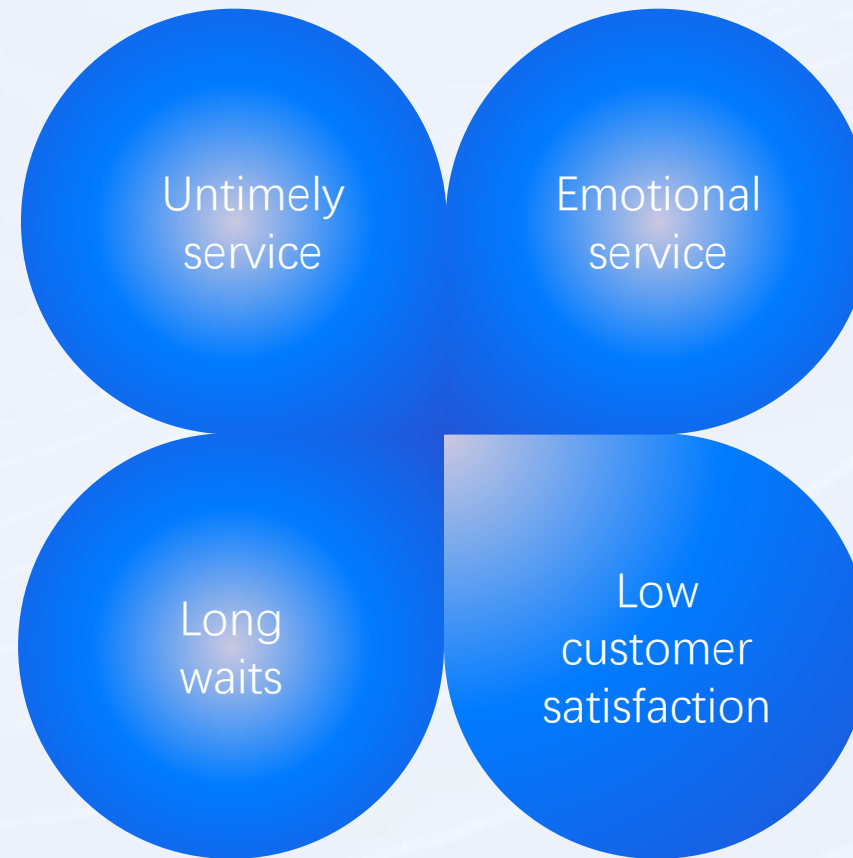

What makes the staff shortage?

Bad user experience

In the first quarter of 2022, customers mentioned short staffing **3 times** more often in their Yelp reviews than in the year-ago period, according to the restaurant review site.

Mentions of long waits rose 23%.

The customer satisfaction scores for independent and small chain restaurants also dropped this year, **to 80 out of 100, from 81.**

Consumers were less happy with fast-food chains this year compared with 2021 — the sector's score **slipped to 76 out of 100, from 78.**

Current state of the cafeteria

Staff Management

Staff have abuse experience from Cafeteria & less of them still want to be a waiter;

Cost Control

Employee turnover makes recruitment more difficult and training costs increase;

Service Efficiency

Staff turnover makes customers have bad experience ,Such as : Long waits, Untimely service....

Chapter 3 , Scenario scheme

Intelligent digital cafeteria

Scenario scheme 1: Cafeteria Experience Process

Intelligent end-to-end Business Process

Pre-meal: Promotion

Brand new store marketing

Large mobile advertising screens provide cafeteria with a wider range, more high-frequency, more eye-catching, more accurate marketing, so that the store's brand, preferential activities, specialty goods and other products touch more customers, activity conversion rate is further improved.

Pre-meal : Promotion

Ketty Bot

18.5" Ads, LCD screen

Better sense of watching

Machine weight 38kg

Battery run time > 8h (one time)

Speed Max 1.2m/s

Charging time 4.5h

Adopt intelligent **screen + power amplifier** to achieve light, sight and sound multi-directional surround attraction.

Built-in advertising screen,
From ergonomics, it perfectly matches the comfort of customers when walking.

PUDUBOT 2

32" Ads, capacitive touch screen

Super large screen, super wide field of view

Machine weight 42kg

Battery run time 8h (one time)

Resolution ratio Max 1.2m/s

power supply mode Charging port supply

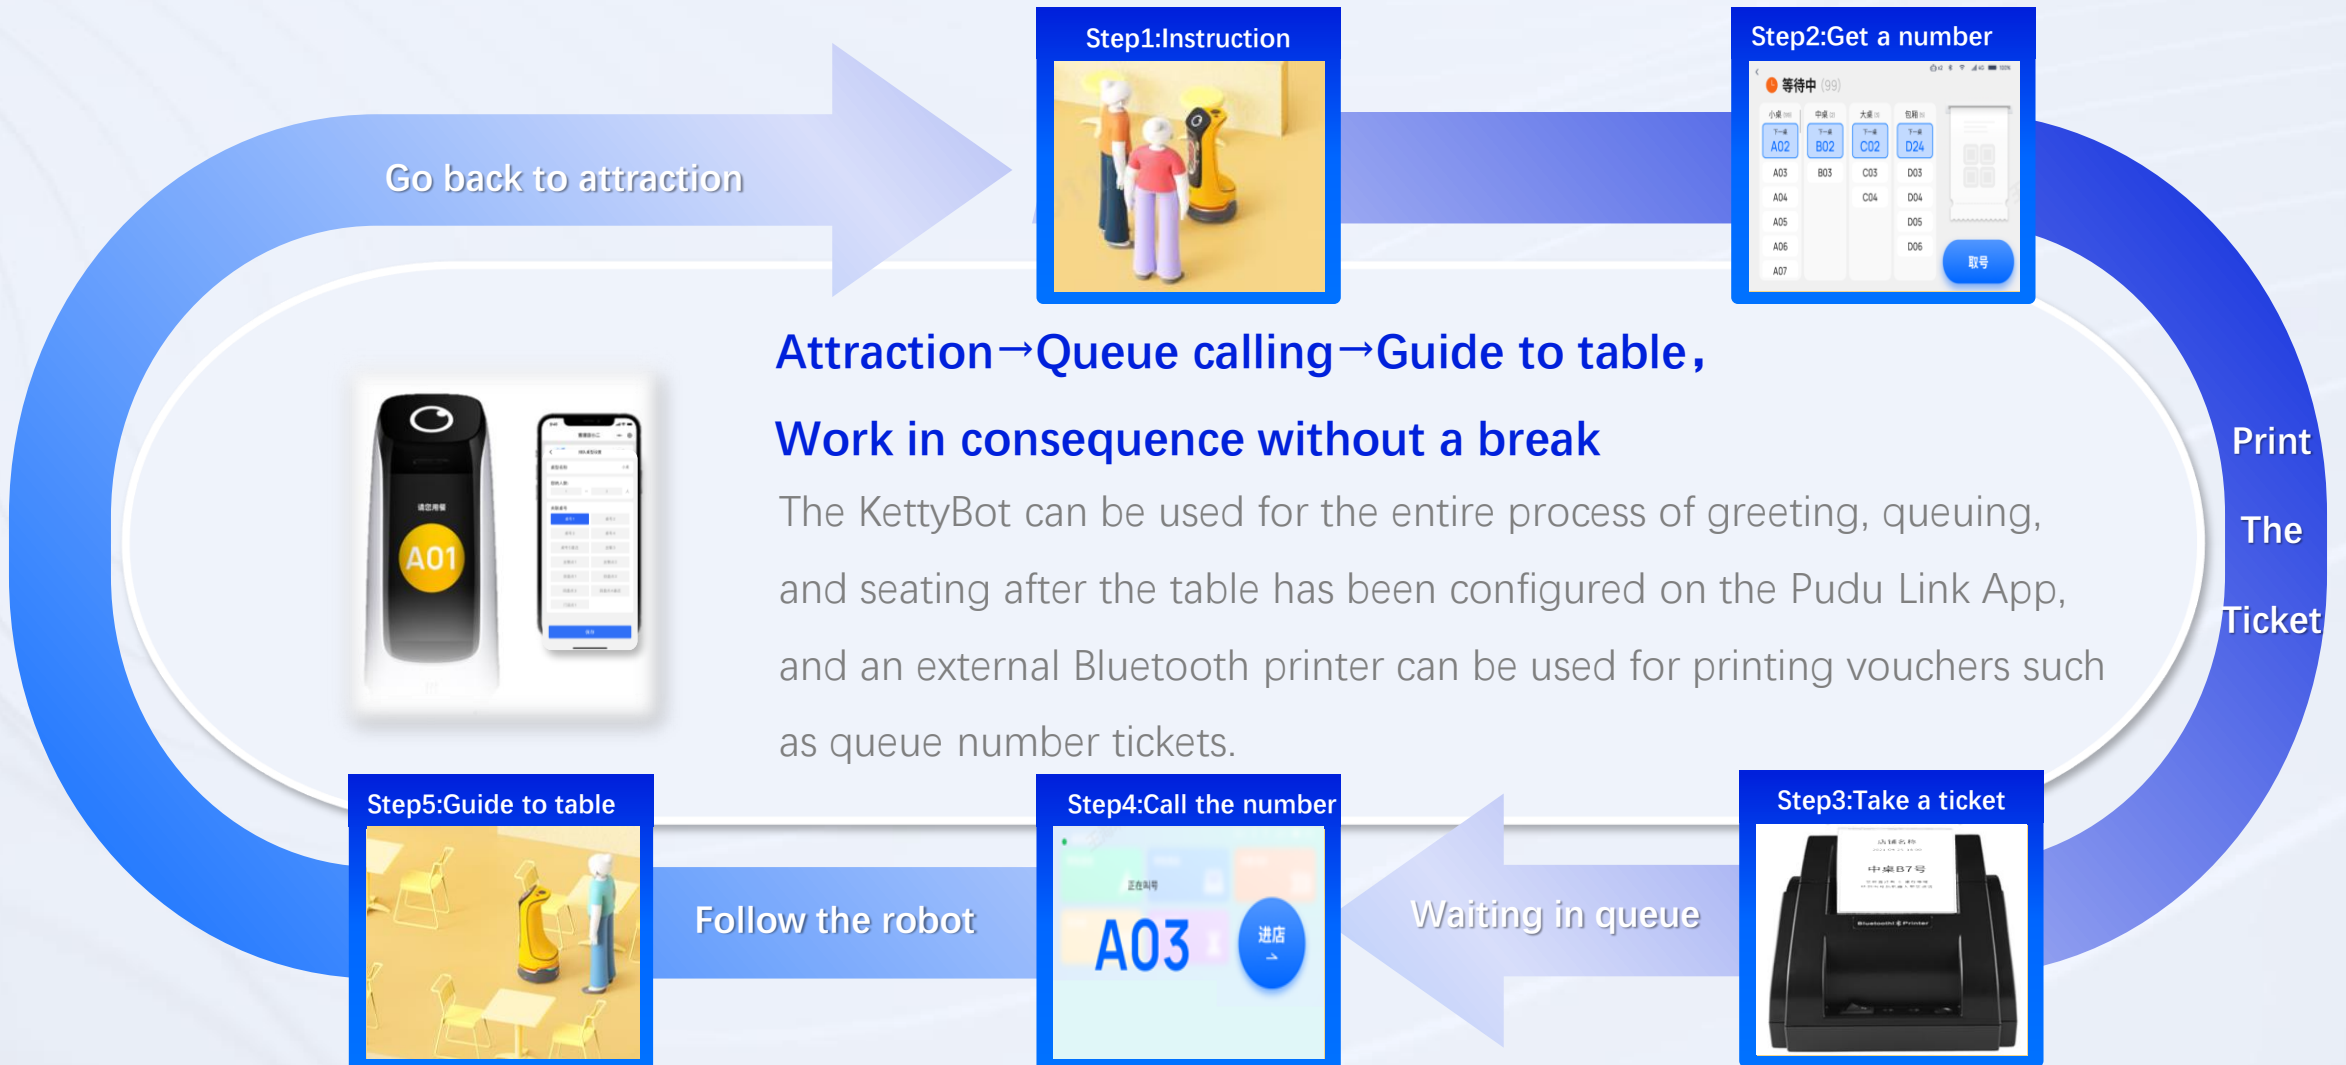

For different scene modes, the presentation form and **content of the size screen can be customized.**

Pre-meal : Promotion

<p>Unlimited duration,unlimited frequency, single daily fee</p> <p>5\$</p> <p>Mobile + technology, more eye-catching</p> <p>Remote advertising via the PUDU Cloud</p> <p>Mobile AD broadcast, full area coverage</p> <p>Buy once, use forever</p>		<p>15s/180 times/day/point position</p> <p>32\$</p> <p>Display less form, easy to be ignored</p> <p>Advertising replacement requires manual field operation, time consuming</p> <p>Fixed display area is about 5m²</p> <p>A promotion requires a large number of advertising screens</p>
<p>Robot mobile advertising screen</p>		<p>Traditional fixed advertising screen</p>

Pre-meal : Queue calling + Guide to table

Dining : Seat and Order

Pudu OS	Support to re-customize the whole process of the robot APP	Pudu2、Bella

Support users with development capabilities for interconnection

Dish recycling present situation

High labor cost

Labor costs account for over **50%** of the overall operating costs while dish recycling occupies over **20%** of the labor costs and showing an increasing trend

Working intensity

Manual delivery with long time and high working intensity. According to statistics, the load of single recycling delivery can reach **15kg**, and everyday delivery exceeds **200** of recycling boxes with the cumulative weight exceeds **1000kg**

Oil pollution

High oil pollution scenario ,recycling process hard to avoid **secondary pollution**, which affects the dining experience

Response speed

Pursuing the ultimate service experience poses higher challenges to recycling efficiency. The task of recycling **starts at random locations** which requires a very short response time that is extremely difficult

Whole meal : Dish Recycle

Multi-functional: 5 Modes Switchable with One Click

In order to adapt to different scenarios robot provides a variety of modes to choose from.

Mode.1:

Manual mode

Manually edit the tasks, can click the screen, or press the pause button to modify the tasks at any time.

Mode.2:

Go Dishwashing

Go back to the dishwashing area

Mode.3:

Go standby point

Go back to standby point

Mode.4:

Dish-return Mode

Go back to standby point

Mode.5:

Scheduled Return

Select an automatic return time, and the robot will go back

Whole meal : Dish Recycle

Dish recycle during cruise mode

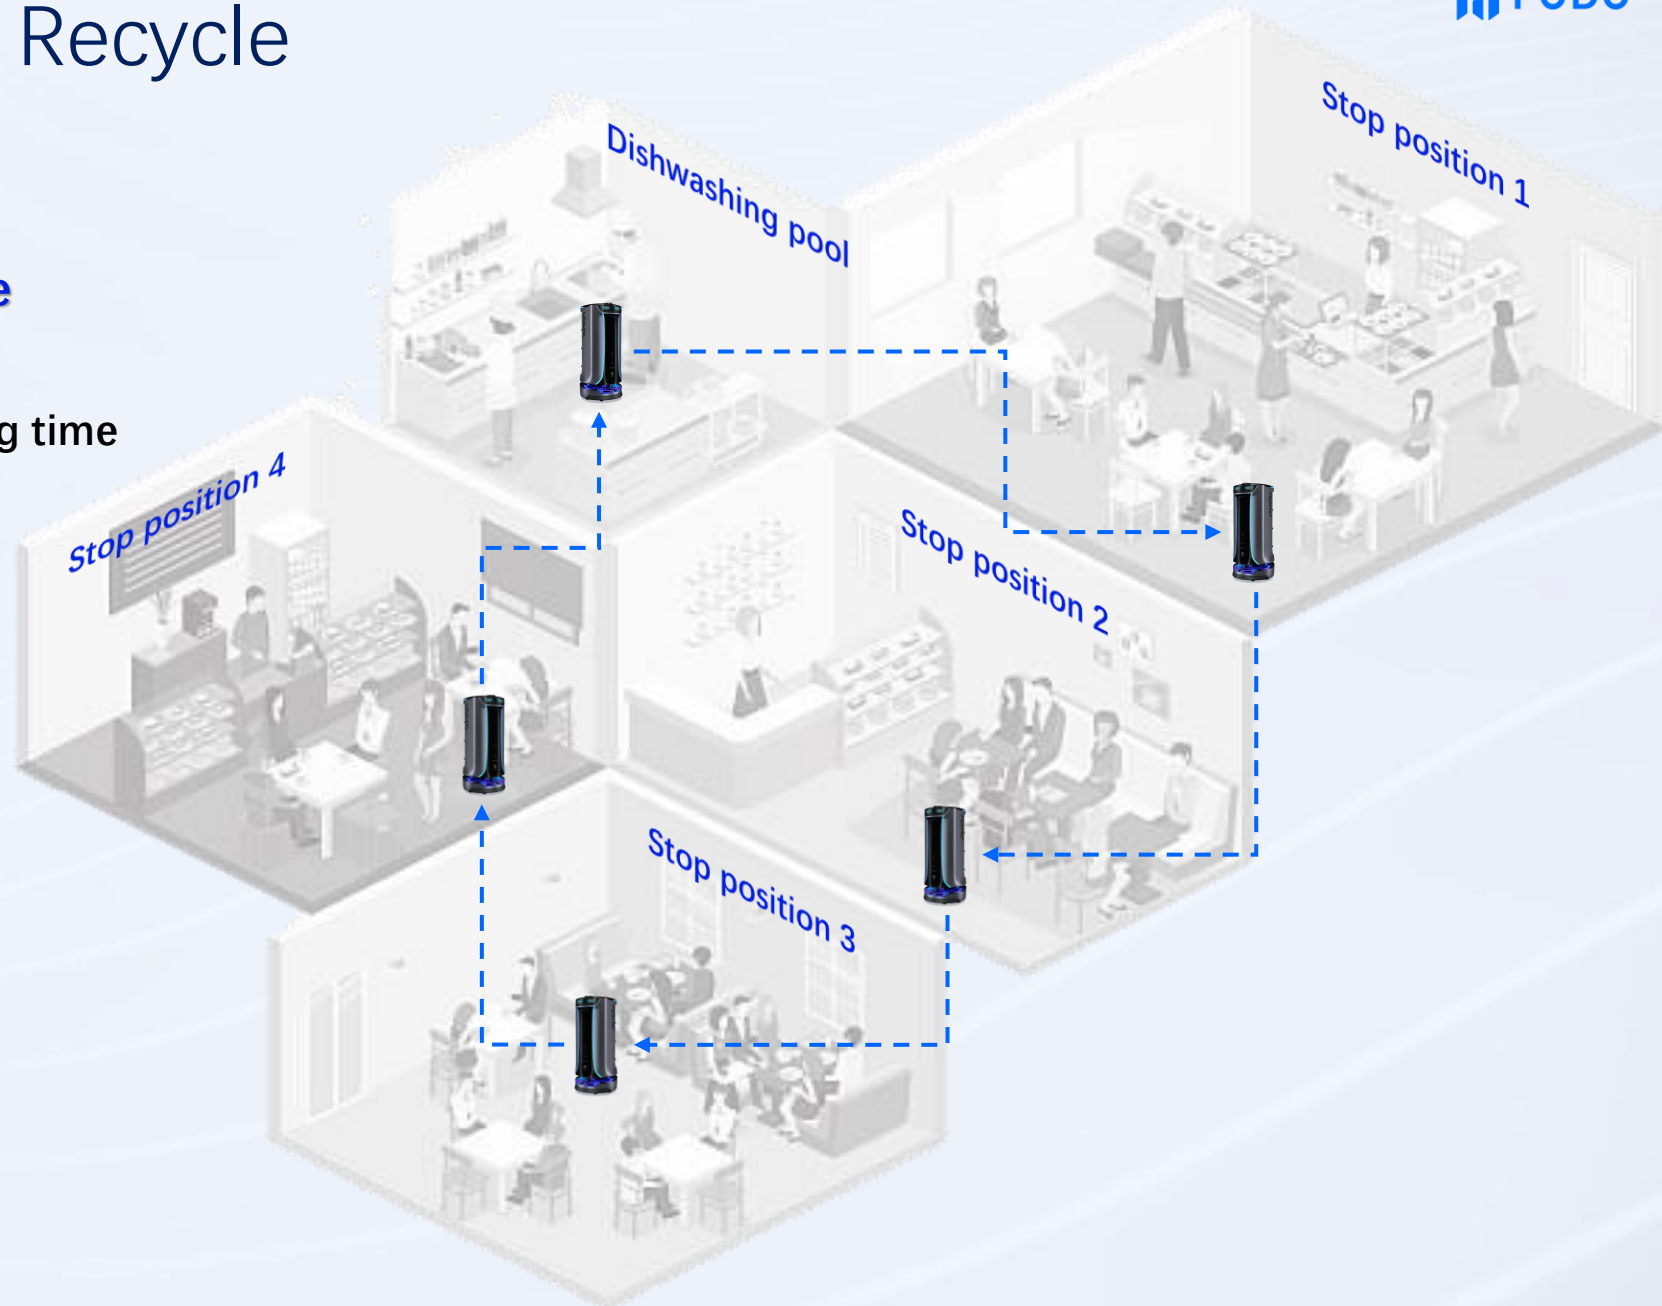

Customized stop position & docking time

Customer spend less time on recycle dishes , robots will waiting for them at fixed position regularly .

More efficiency

More convenient

IPX5 water and oil proof , so that HolaBot can be used for long .

After meal : Cleaning

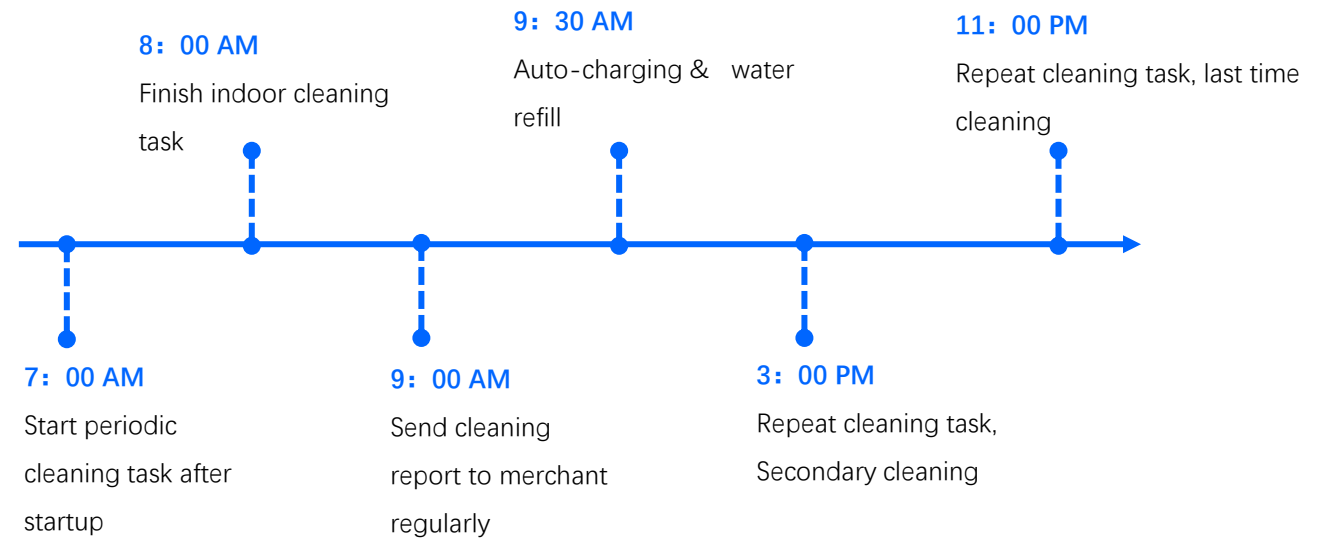

Simply Remote monitoring, easy to use
